

DEFINITION OF SERVICES

Teletherapy is a form of psychological service provided via internet technology, which can include consultation, treatment, transfer of medical data, emails, telephone conversations and/or education using interactive audio, video, or data communications. I also understand that teletherapy involves the communication of my medical/mental health information, both orally and/or visually.

Teletherapy has the same purpose or intention as psychotherapy or psychological treatment sessions that are conducted in person. However, due to the nature of the technology used, I understand that teletherapy may be experienced somewhat differently than face-to-face treatment sessions.

CLIENT'S RIGHTS, RISKS, AND RESPONSIBILITIES

I understand that I have the following rights with respect to teletherapy:

1. I, the client, need to be a resident of California. (This is a legal requirement for clinicians practicing in this state under a CA license.)
2. I, the client, have the right to withhold or withdraw consent at any time without affecting my right to future care or treatment.
3. The laws that protect the confidentiality of my medical information also apply to teletherapy. As such, I understand that the information disclosed by me during the course of my therapy or consultation is generally confidential. However, there are both mandatory and permissive exceptions to confidentiality, which are described in the general Consent Form I received at the start of my treatment.
4. I understand that there are risks and consequences of participating in teletherapy, including, but not limited to, the possibility, despite best efforts to ensure high encryption and secure technology on the part of my clinician, that: the transmission of my information could be disrupted or distorted by technical failures; the transmission of my information could be interrupted by unauthorized persons; and/or the electronic storage of my medical information could be accessed by unauthorized persons.
5. There is a risk that services could be disrupted or distorted by unforeseen technical problems.
6. In addition, I understand that teletherapy based services and care may not be as complete as face-to-face services. I also understand that if my clinician believes I would be better served by another form of therapeutic services (e.g. face-to-face services) I will be referred to a professional who can provide such services in my area, if my clinician is unable to provide such services.
7. I understand that I may benefit from teletherapy, but that results cannot be guaranteed or assured. I understand that there are potential risks and benefits associated with any form of psychotherapy, and that despite my efforts and the efforts of my clinician, my

condition may not improve, and in some cases may even get worse.

8. I accept that teletherapy does not provide emergency services. If I am experiencing an emergency situation, I understand that I can call 911 or proceed to the nearest hospital emergency room for help. Clients who are actively at risk of harm to self or others are not suitable for teletherapy services. If this is the case or becomes the case in future, my psychologist will recommend more appropriate services. If I am having suicidal thoughts or making plans to harm myself, I can call:
 - 8.1. National Suicide Prevention Lifeline at 1(800) 273.TALK (8255)
 - 8.2. San Diego Access & Crisis Line at 1 (888) 724-7240
 - 8.3. (Veterans only) VAMC La Jolla After Hours Care at 1 (858) 552-4344
9. I understand that there is a risk of being overheard by anyone near me if I am not in a private room while participating in teletherapy. I am responsible for (1) providing the necessary computer, telecommunications equipment and internet access for my teletherapy sessions, and (2) arranging a location with sufficient lighting and privacy that is free from distractions or intrusions for my teletherapy session. It is the responsibility of the psychological treatment provider to do the same on their end.
10. I understand that dissemination of any personally identifiable images or information from the telemedicine interaction to researchers or other entities shall not occur without my written consent.

I have read this document carefully and understand the risks and benefits related to the use of teletherapy services. I have the right to discuss any of this information with my therapist and to have any questions I may have regarding my treatment answered to my satisfaction. I understand that I can withdraw my consent to Teletherapy communications by providing written notification to Blueprint Counseling Solutions.

I hereby give my informed consent to participate in the use of telehealth services for treatment under the terms described herein.
